

YOUNG WOMEN...

get breast cancer too!

Global AYA
(15-39 years)
Cancer Diagnosis

**ABOUT
180,000** **YOUNG WOMEN**
ARE DIAGNOSED WITH
BREAST CANCER
EVERY YEAR GLOBALLY

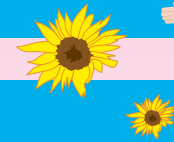

AYA CANCER
1.3 MILLION
INCIDENT CASES OF
CANCER GLOBALLY

Breast Cancer in young women is the leading cause of AYA cancer deaths!

BREAST CANCER IS THE MOST COMMON CANCER IN YOUNG WOMEN (15-39 years)

- higher AYA cancer incidence among young women is due to high numbers of breast and cervical cancer
- highest proportion of categorized AYA deaths and disability-adjusted life years (DALYs) are attributed to breast cancer

WHY EARLY DETECTION MATTERS!

- young women are more frequently diagnosed with late stage breast cancer
- incidence of breast cancer in young women is rising globally
- young women are more likely to be diagnosed with advanced breast cancer
- young women experience more aggressive disease with lower survival rates
- when diagnosed early there is usually a better chance of successful treatment
- earlier diagnosis can occur when young women report unusual breast changes to their health care provider
