

YOUNG WOMEN...

get breast cancer too!

BCYW DISPARITIES

Breast Cancer is the most common AYA cancer
BCYW incidence is rising globally
Breast Cancer is the leading cause of AYA cancer death

YOUNG WOMEN

- no routine breast screening
- frequently diagnosed late stage
- added stress due to late diagnosis
- diagnosed with more aggressive disease
- increased risk of inflammatory breast cancer (IBC)
- poorer outcomes including lower survival rates

OLDER WOMEN

- routine breast screening available
- frequently diagnosed early
- less diagnostic stage stress
- diagnosed with less aggressive disease
- less risk of inflammatory breast cancer (IBC)
- better outcomes including survival
